PROFESSIONAL SUMMARY

- Flutter Developer with 2+ years expertise in cross-platform development focusing on responsive UI, clean architecture, and advanced state management (Riverpod, Bloc, Provider). Full-stack capabilities with Go/Node.js backends. Track record of shipping production apps for iOS, Android and web with robust performance optimization and offline-first architecture.

TECHNICAL SKILLS

Flutter: State Management (Riverpod, Bloc, Provider), Clean Architecture, Custom Animations/Painters, Navigation 2.0
Languages & Tools: Dart, Go (GIN), JavaScript (Node.js), RESTful APIs, AWS, Firebase, SQLite, PostgreSQL

WORK EXPERIENCES

Internshala
Associate Software Engineer

Feb 2024 - Present
(On-site) Gurugram

- Architected iOS Flutter application using Riverpod with clean architecture principles
- Implemented cookie management and API calling system with retry mechanisms
- Developed reusable UI component library, increasing development velocity by 30%
- Implemented complex in-app purchase flow with proper state handling and error recovery mechanisms
- **Technologies:** Flutter, Riverpod, Clean Architecture, Dio, iOS Development

Visario
Full Stack Developer

Sep 2023 - Feb 2024
(Remote) Amsterdam

- Built visa application platform with Flutter frontend and Go backend on AWS
- Designed multi-step flows with document processing and cross-platform UI adaptation
- Integrated Razorpay payment gateway with transaction validation systems
- **Technologies:** Flutter (Riverpod), Go, AWS (Cognito, Lambda, API Gateway, DynamoDB)

Subspace
SDE Intern

Oct 2023 - Dec 2023
(Remote) Bengaluru

- Built Flutter applications with Bloc pattern for predictable state flows
- Optimized memory usage through efficient widget rebuilding and render optimization
- Implemented GraphQL for efficient real-time data synchronization
- **Technologies:** Flutter (Bloc), GraphQL, Performance Optimization

AsyncApp YouTube
Flutter and Full-Stack Educator

Feb 2023 - Present
YouTube Channel

- Create educational content on Flutter development, state management, and architecture
- Demonstrate complex features including animations, painters, and platform integration
- **Technologies:** Flutter, Go, Node.js, AWS, Firebase, Cross-Platform Development

EDUCATION

Rajkiya Engineering College Sonbhadra
Bachelor of Technology (Computer Science)

07 2020 – 07 2024
Sonbhadra, India

PROJECTS

Parcha (Invoice & Inventory) 🔗 | Flutter, Riverpod, SQLite
12 2023

- Built cross-platform app for desktop, mobile, and web with offline-first architecture using SQLite/IndexDB
- Implemented custom PDF invoice generation with payment solutions and responsive UI
- Live App

Shyampatt (Drawing App) 🔗 | Flutter, Riverpod, CustomPainter
09 2023

- Created cross-platform drawing app using CustomPainter with persistent state management
- Implemented gesture recognition for natural drawing experience across devices
- Live App

Utility Flutter Package 🔗 | Flutter, Dart, HTTP
10 2023

- Published Flutter package (500+ downloads) with HTTP client and local storage utilities
- Implemented standardized API request handling with built-in retry mechanisms
- See on Pub.dev

CERTIFICATIONS & ACHIEVEMENTS

- **Flutter Development Bootcamp with Dart** - Course on widgets, state management, and architecture
- **Published Applications** - Multiple apps on Google Play Store with 10K+ combined downloads
- **Technical Leadership** - Led mobile teams and mentored developers through YouTube channel
